

Neuhaus – Sound work for the Spider Escalator at LACMA

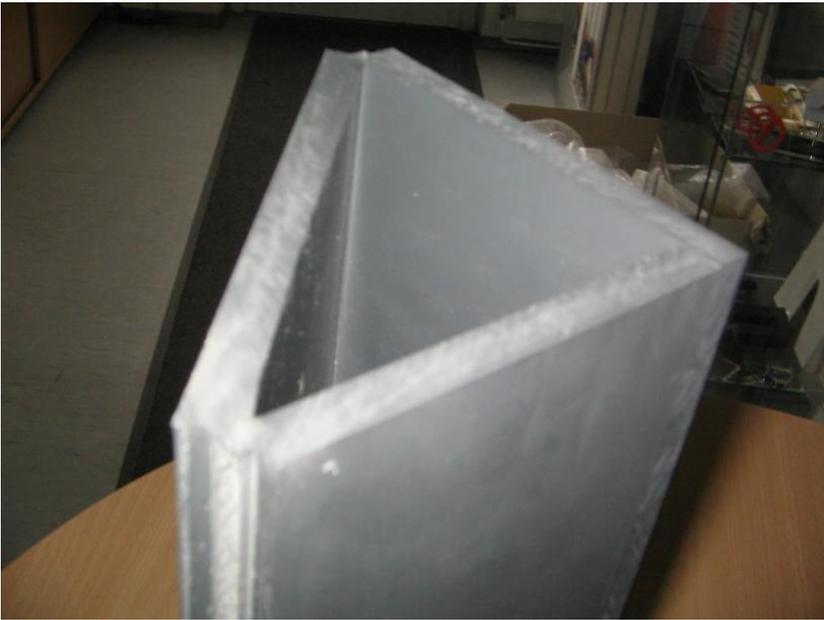

January 2007 2008

Project only

The Lacma Project, 2007

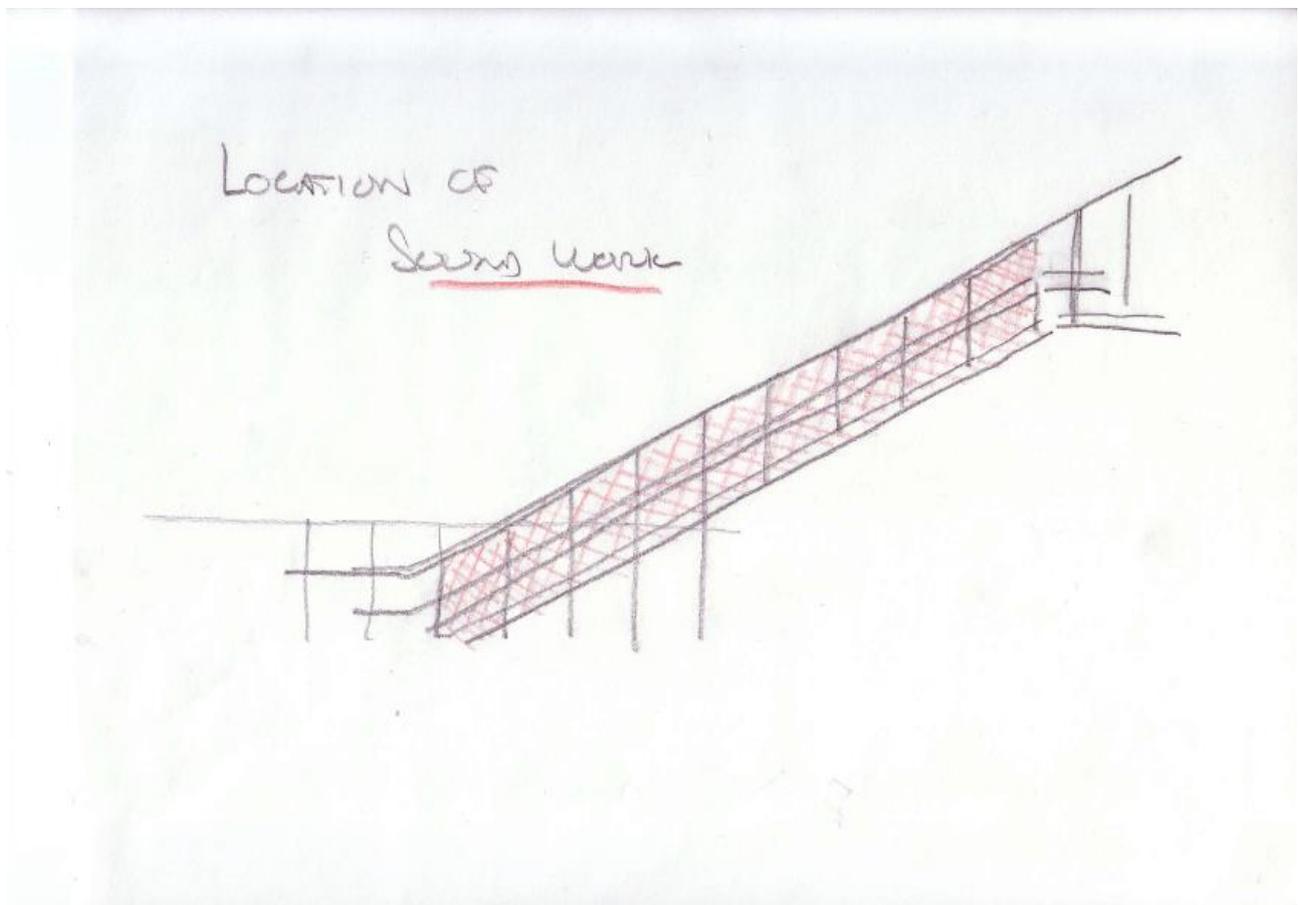

Photo of the Test speakers were installed on the Terrace of Villa Cesina in Capri, Italy.

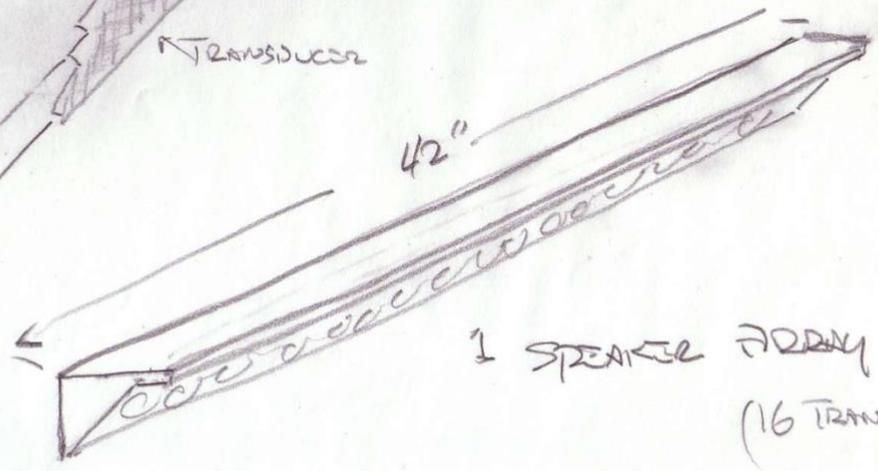

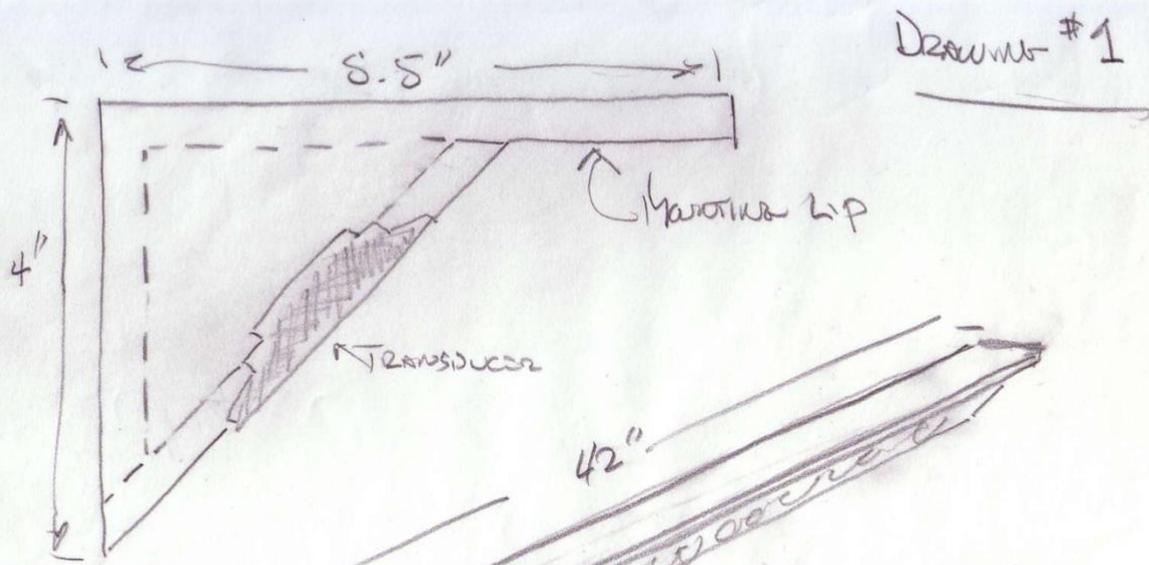

Prototypes Lacma Project 2007

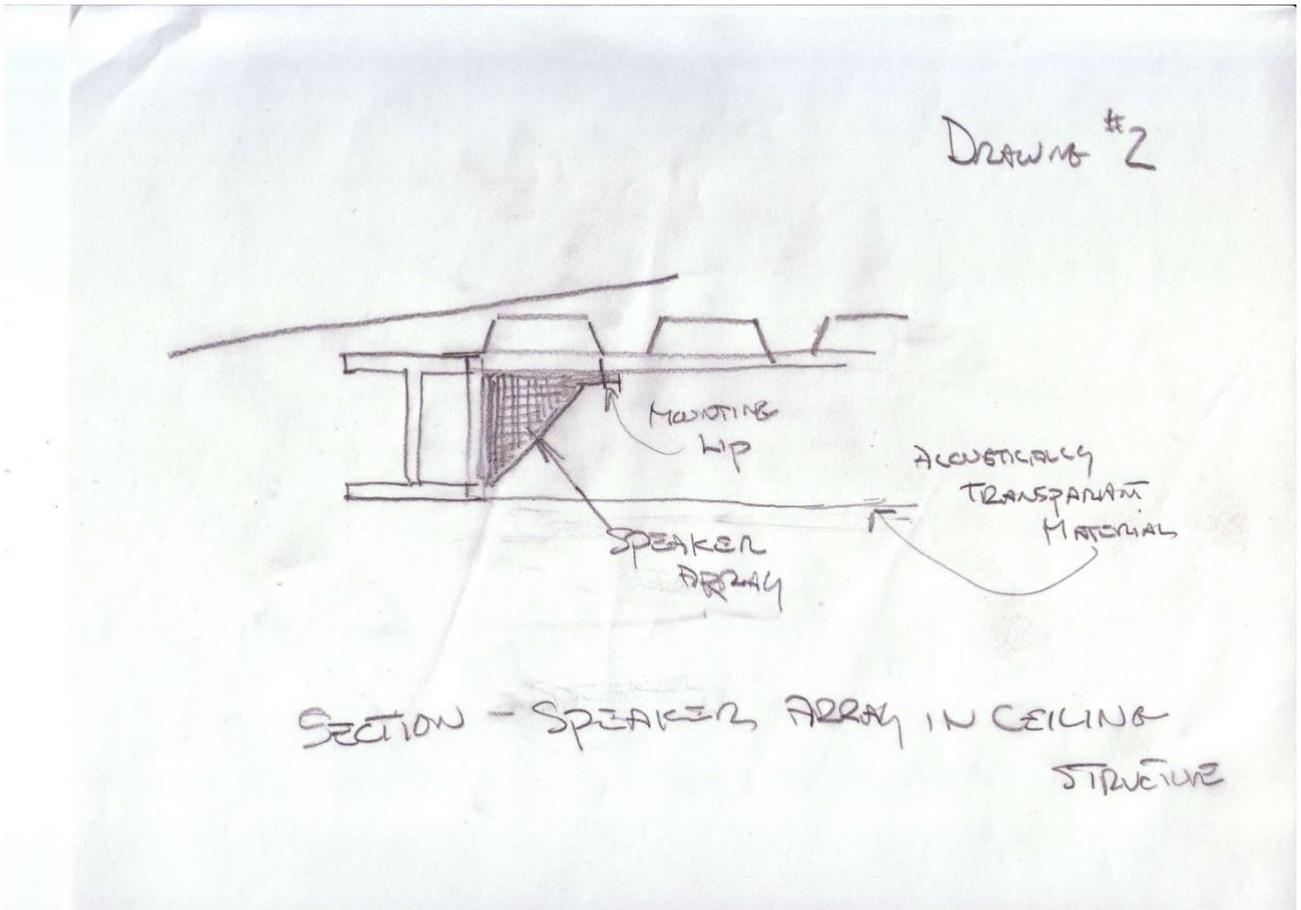

The installation will have four basic parts:

1. 36 speaker arrays mounted in the escalator's ceiling -- sixteen on each side end to end along its length.
2. An standard electronics enclosure installed in a centrally located utility room connected to AC power and the internet.
3. A cable from each speaker array to amplifiers installed in the electronics enclosure.
4. Electronics installed in the utility room enclosure which will generate the work's sounds and monitor the correct operation of the whole system.

1 STRAIN ROD -
(16 TRANS-DUCERS)
